Contents

No. 1 (February 1986)

PAGE

Seasonal variation and characterization of Micrococcaceae present in ewes' raw milk. L. BAUTISTA, M. P. BERMEJO and M. NUÑEZ . . 1

Short-term associations between disease and milk yield of dairy cows. S. LUCEY, G. J. ROWLANDS and A. M. RUSSELL 7

Effects on mastitis of overmilking in conjunction with pulsation failure. G. A. MEIN, M. R. BROWN and D. M. WILLIAMS 17

Relationship between ethanol stability of bovine milk and natural variations in milk composition. W. J. DONNELLY and D. S. HORNE. 23

Fractionation of bovine caseins by reverse phase high performance liquid chromatography: identification of a genetic variant. C. CARLES . . 35

Analysis by fast protein liquid chromatography of variant of κ-casein and their relevance to micellar structure and renneting. D. G. DALGLEISH . . 43

Separation of casein aggregates cross-linked by colloidal calcium phosphate from bovine casein micelles by high performance gel chromatography in the presence of urea. T. AOKI, Y. KAKO and T. IMAMURA . . . 53

Development of an objective method for assessing the mechanical strength of casein curd. M. S. JABLONKA and P. A. MUNRO 61

Effect of precipitation temperature and pH on the mechanical strength of batch precipitated acid casein curd. M. S. JABLONKA and P. A. MUNRO . 69

Effect of pH on the formation of deposit from milk on heated surfaces during ultra high temperature processing. P. J. SKUDDER, B. E. BROOKER, A. D. BONSEY and N. R. ALVAREZ-GUERRERO. 75

Effects of iodate, hydrogen peroxide and dichromate on the denaturation of whey proteins in heated milk. R. J. MARSHALL 89

Physicochemical properties of proteinases from selected psychotrophic bacteria. G. E. MITCHELL, K. N. EWINGS and J. P. BARTLEY . . . 97

A rapid colorimetric assay for the extracellular lipase of *Pseudomonas fluorescens* B52 using β-naphthyl caprylate. R. C. MCKELLAR . . . 117

Effect of size of casein micelles on coagulation properties of skim milk. G. D. FORD and A. S. GRANDISON 129

No evidence for the presence of β-casomorphins in human plasma after ingestion of cows' milk or milk products. H. TESCHEMACHER, M. UMBACH, U. HAMEL, K. PRAETORIUS, G. AHNERT-HILGER, V. BRANTL, F. LOTTSPEICH and A. HENSCHEN 135

Review article. Proteinases of psychrotrophic bacteria: their production, properties, effects and control. D. J. FAIRBAIRN and B. A. LAW . . 139

No. 2 (May 1986)

The bovine teat canal: information from measurement of velocity of milk flow from the teat. D. M. Williams and G. A. Mein 179

Residual milk in Friesland sheep and the galactopoietic effect associated with oxytocin treatment. R. B. Heap, I. R. Fleet, R. Proudfoot and D. E. Walters. 187

Determinants of bacterial replication rates in mastitic whey. T. Mattila, J. Syvăjärvi, N.-E. Jensen and M. Sandholm 197

Interaction of factors which influence the extent of lipolysis during milking and storage of raw milk. E. C. Needs, M. Anderson and S. V. Morant . 203

Chemical composition of milk from a herd of Norwegian goats. J. Brendehaug and R. K. Abrahamsen 211

Seasonal changes in the fat composition and concentration of citrate and related metabolites in cows' milk. A. Faulkner, E. Y. Brechany, R. M. Mabon and H. T. Pollock 223

Complementary action of dipeptidyl peptidase IV and aminopeptidase M in the digestion of β-casein. E. Heymann and R. Mentlein . . . 229

Heat stability of milk: further studies on the pH-dependent dissociation of micellar κ-casein. H. Singh and P. F. Fox 237

Irreversible heat denaturation of bovine α-lactalbumin. L. C. Chaplin and R. L. J. Lyster 249

Heat stability of plasmin (milk proteinase) and plasminogen. E. Alichanidis, J. H. M. Wrathall and A. T. Andrews. 259

An empirical mathematical model of retentate composition in ultrafiltration of dairy products. O. de Rham and S. Chanton 271

Determination of tensile strength of gels prepared from fractionated whey proteins. K. R. Langley, D. Millard and E. W. Evans . . . 285

Determination of lactulose and soya oligosaccharides in infant formula milk feeds. R. C. Beach and I. Menzies 293

Determination of the extracellular lipases of *Pseudomonas fluorescens* spp. in skim milk with the β-naphthyl caprylate assay. R. C. McKellar and H. Cholette 301

Increasing cheese yields by high heat treatment of milk. R. J. Marshall . 313

Heat-induced deposit formation and its relationship to heat stability in a blend of recombined and fresh milk. R. M. Joshi and A. A. Patel . . . 323

Effect of replacing part of the sodium chloride in Cheddar cheese by sodium or potassium phosphates on ripening, flavour and texture. M. L. Green . 329

Review article. Structure and function of the phosphorylated residues of casein. D. W. West 333

No. 3 (August 1986)

Salt distribution between the colloidal and soluble phases of ewes' milk. A. POLYCHRONIADOU and A. VAFOPOULOU 353

Use of Platelet Aggregometer to monitor the chymosin-initiated coagulation of casein micelles. N. A. BRINGE and J. E. KINSELLA 359

Influence of calcium chloride on the chymosin-initiated coagulation of casein micelles. N. A. BRINGE and J. E. KINSELLA 371

Effect of casein micelle composition and casein dephosphorylation on coagulation and syneresis. M. J. PEARSE, P. M. LINKLATER, R. J. HALL and A. G. MACKINLAY 381

Keeping quality of milk in relation to the copper content and temperature of pasteurization. J. E. FORD, M. J. A. SCHRÖDER, M. A. BLAND, K. S. BLEASE and K. J. SCOTT 391

Factors affecting the ethanol stability of bovine skim milk. VII. Lactational and compositional effects. D. S. HORNE, T. G. PARKER, W. J. DONNELLY and D. T. DAVIES 407

Radioimmunoassay for measurement of bovine α-lactalbumin in serum, milk and tissue culture media. R. M. AKERS, T. B. MCFADDEN, W. E. BEAL, A. J. GUIDRY and H. M. FARRELL 419

Production of cream from ultrafiltered milk. P. G. SCURLOCK . . . 431

Identification of cheese-smear coryneform bacteria. H. SEILER . . . 439

An inhibitor typing scheme for *Streptococcus uberis*. J. R. TAGG and L. G. VUGLER 451

Purification and characterization of the extracellular proteinase of *Pseudomonas fluorescens* NCDO 2085. D. J. FAIRBAIRN and B. A. LAW . . 457

Effect of different neutralizing treatments on the efficiency of an anaerobic digester fed with deproteinated cheese whey. J. DE HAAST, T. J. BRITZ and J. C. NOVELLO 467

Extensive degradation of casein by plasmin does not impede subsequent curd formation and syneresis. M. J. PEARSE, P. M. LINKLATER, R. J. HALL and A. G. MACKINLAY 477

Review article. Microbial lipases: their characteristics, role in food spoilage and industrial uses. D. STEAD 481

No. 4 (November 1986)

Influence of the lactoperoxidase system on susceptibility of the udder to *Streptococcus uberis* infection. V. M. E. MARSHALL, W. M. COLE and A. J. BRAMLEY 507

Effect of subclinical mastitis on milk plasminogen and plasmin compared with that on sodium, antitrypsin and *N*-acetyl-β-D-glucosaminidase. J. SCHAAR and H. FUNKE 515

Effect of stage of lactation, stage of pregnancy, milk yield and herd management on seasonal variation in spontaneous lipolysis in bovine milk. M.-P. Chazal and Y. Chilliard 529

^{31}P-nuclear magnetic resonance study of milk fractions. M. Wahlgren, T. Drakenberg, H. J. Vogel and P. Dejmek 539

Molecular weights of subunit components of bovine casein micelles. T. Ono and T. Takagi 547

Effects of colloidal calcium phosphate content and free calcium ion concentration in the milk serum on the dissociation of bovine casein micelles. C. Holt, D. T. Davies and A. J. R. Law 557

Composition and interfacial properties of casein micelle fractions. M. Britten, M. Boulet and P. Paquin 573

Effect of heat treatment on casein micelle profiles obtained by controlled pore-glass chromatography. M. Anderson, C. Moore and M. C. A. Griffin . 585

Determination of gradient elution conditions for the separation of peptide mixtures by reversed-phase high-performance liquid chromatography: bovine β-casein tryptic digest. C. Carles and B. Ribadeau-Dumas . 595

Potassium iodate-induced proteolysis in ultra heat treated milk during storage: the role of β-lactoglobulin and plasmin. M. B. Grufferty and P. F. Fox 601

Effect of storage, light and homogenization on the colour of ultra heat treated and sterilized milk. G. R. Andrews 615

A qualitative screening procedure for the detection of casein hydrolysis by bacteria, using sodium dodecyl sulphate polyacrylamide gel electrophoresis. S. H. A. Hill and M. J. Gasson 625

Influence of mastitis on growth of starter organisms used for the manufacture of fermented milks. I. Okello-Uma and V. M. E. Marshall 631

Measurement and calculation of water activity in Blue cheese. J. Fernández-Salguero, M. Alcalá, A. Marcos and M. A. Esteban 639

Effects of variations in somatic cell count on the rennet coagulation properties of milk and on the yield, composition and quality of Cheddar cheese. A. S. Grandison and G. D. Ford 645

Genetic polymorphism of bovine chymosin. W. J. Donnelly, D. P. Carroll, D. M. O'Callaghan and D. Walls. 657

Review article. Formation and occurrence of lactulose in heated milk. G. R. Andrews 665
